

ChartMaker® PatientPortal Release Notes

ChartMaker® 2018.2 (fv6.4.8) (Deployed 07/09/2020)

Added Features

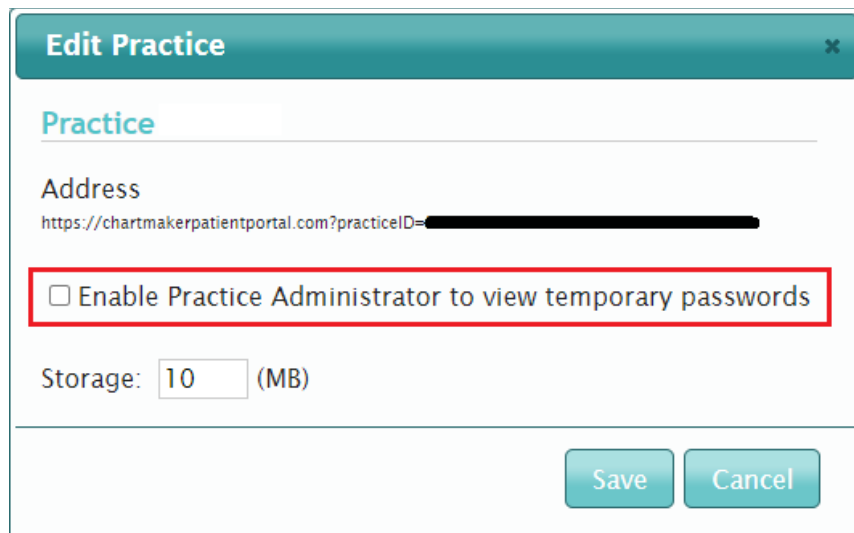

- **PatientPortal – Practice Administration – Practice – Temporary Passwords** – The Practice Settings page has been updated with an **Admin View Temp Password** column that displays whether portal administrators have the ability to view the temporary password when resetting a password for a patient (Yes or No). See Figure 1. This new setting will be defaulted to No.

Name	ID	Storage (MB)	Admin View Temp Password	Enabled	Settings	Terms of Use
------	----	--------------	--------------------------	---------	----------	--------------

Figure 1 – Practice Settings – Practice List

To enable a practice so administrators can view temporary passwords, simply access the **Edit Practice** dialog, and select the new **Enable Practice Administrator to view temporary passwords** option, and then click the Save button. See Figure 2.

Added Features (continued)

PatientPortal – Practice Administration – Practice – Temporary Passwords (continued)

Whenever the **Enable Practice Administrator to view temporary passwords** option is active for a practice, the **Admin View Temp Password** column will display **Yes** for the corresponding practice. Likewise, when an administrator changes a password for a patient, after confirming the password reset, the Reset Password Message dialog will appear and will contain the temporary password. See Figure 3. This allows you to provide the patient with the temporary password, if needed.
